

Global Superstore Business Intelligence

Executive Presentation

Satyajit Rao

TNM Software Solutions Pvt. Ltd.

Business Problem

2

- Understand how the business is performing.
- Find which customers and categories contribute most.
- Identify areas where profitability can improve.

Approach

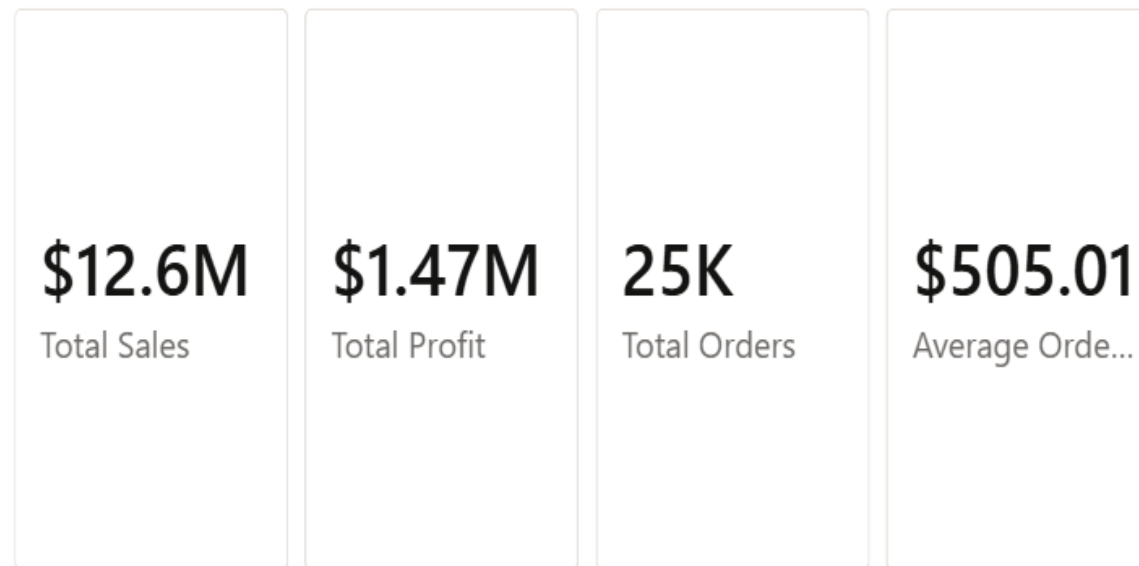

3

- Used the Global Superstore dataset.
- Cleaned and organized the data for analysis.
- Built a four-page Power BI dashboard.

Strong Overall Performance

4

- Sales reached around \$12.64M.
- Profit reached around \$1.47M.
- The focus should be on keeping this growth profitable.

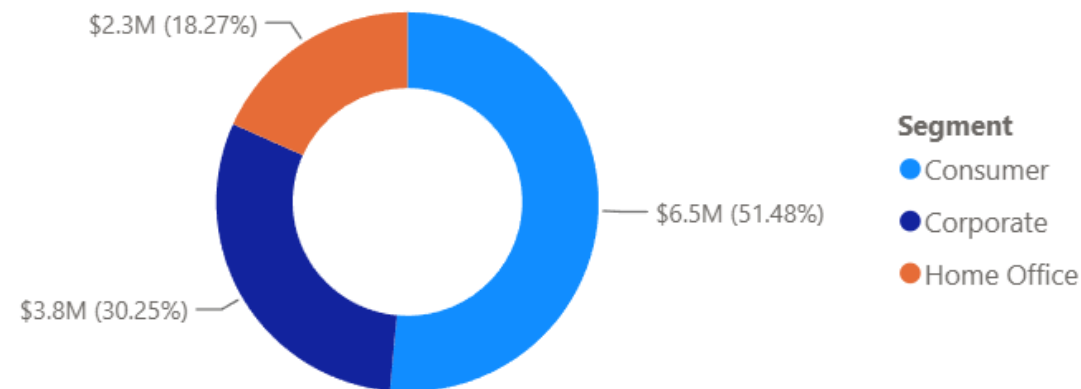

Consumer Segment Leads Sales

5

- Consumer sales are around \$6.5M.
- This is 51.48% of total sales.
- Keeping and growing this segment should be a priority.

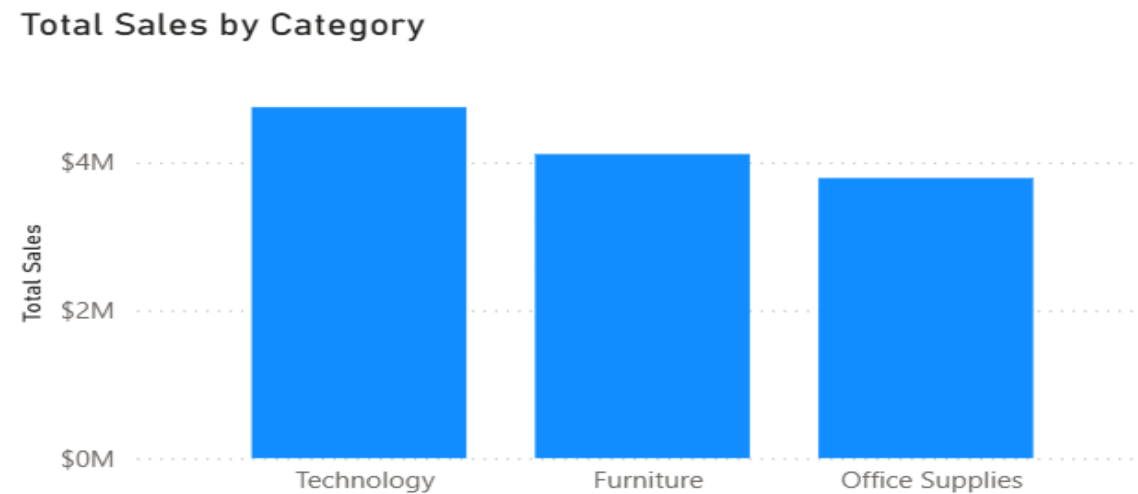

Total Sales by Segment

Technology Is a Strong Category

6

- Technology has the highest sales among the categories.
- Its profit margin is around 14%.
- The business should continue supporting this strong category.

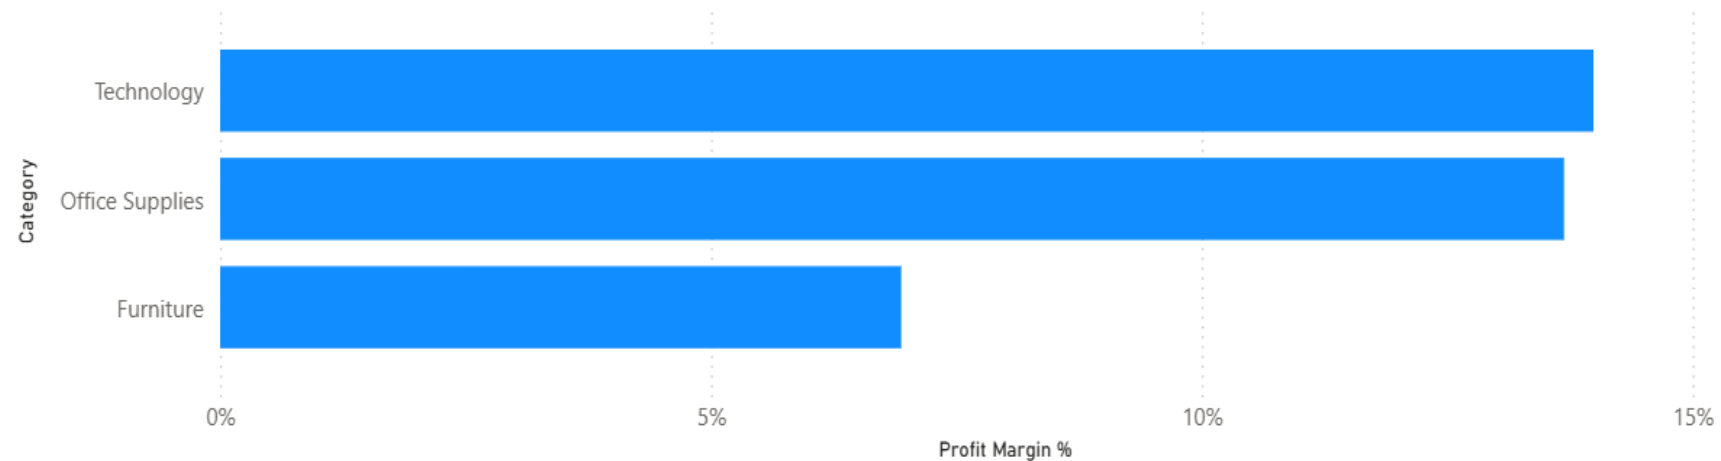

Furniture Has Lower Profitability

7

- Furniture has a profit margin of around 7%.
- This is lower than Technology and Office Supplies.
- Pricing and costs should be reviewed to improve the margin.

Profit Margin % by Category

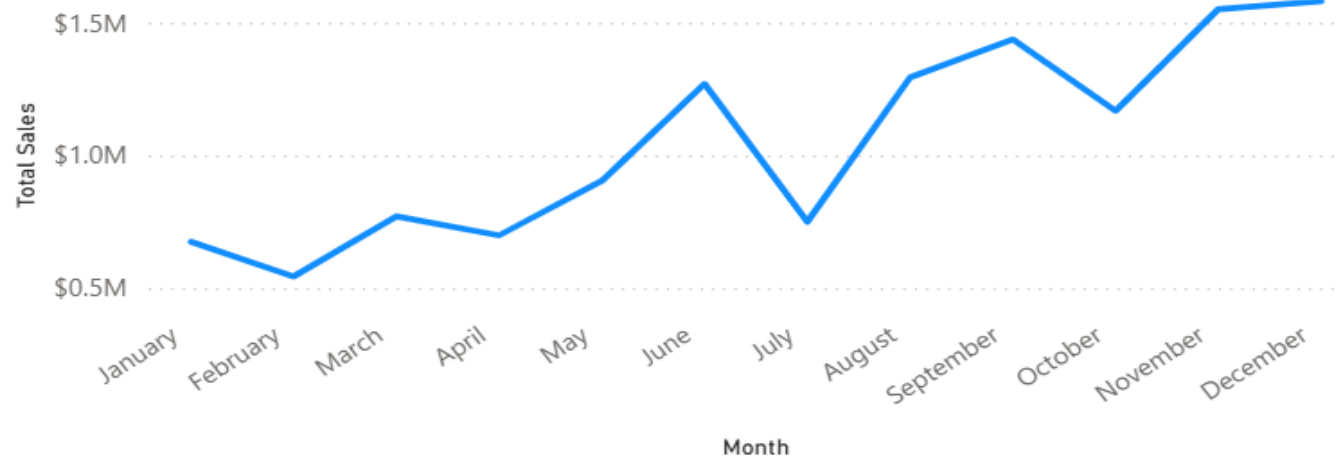

Sales Change During the Year

8

- Sales change noticeably across the year.
- November and December are stronger months.
- February is one of the weaker months, so planning can be adjusted.

Total Sales by Month

Recommendations

9

- Focus on retaining consumer customers.
- Work on improving furniture profitability.
- Plan marketing and inventory around stronger and weaker months.

Thank You / Questions

10

Thank you for your time.

Questions and discussion.
